

ITB 17-04-02  
Salem Avenue Demolition and Paving (Non - Mandatory)  
11:00 AM Tuesday November 1, 2016

The project's goal is to widen the surface area of the street at the rear of 360 Salem Avenue. Vehicles are having difficulty driving to the private parking area.

The wall that is being demolished is not the full length of the building but the area paved will be from building corner to building corner. The wall is separate from the building foundation and it is not known if there is a footer.

There are plans to install an ADA handicap ramp adjacent to the new paving.
