Roanoke River Flood Reduction Maintenance (Non-Mandatory)
11:00 AM Thursday May 26, 2016

This is a maintenance project along the Roanoke River that will be a 1 year contract with four (4) optional 1 year extensions, which would need to be approved. The Bid is for maintenance only (mowing, trash removal, etc.). There will be no earthmoving or excavation. Bidders should visit the specified sites for maintenance. The quantities on the bid form are based on records of previous maintenance and are annual. Only the line items on the bid form are to be worked on. The frequency of the maintenance will be determined after the initial session.

Exhibit 2 of the bid form lists the access points for each location. The maximum weight for the bridges across the Greenways is displayed on a plaque at each bridge. Aerial pictures show specific areas that need to be worked on with a legend for descriptions. If anything in the field differs from the scope and the drawings, the successful bidder will need to inform the City. Each line item on the Bid Form has a description in the Special Conditions section of the bid form (pg. 26-27). The area labeled Bench cut 465 on page 54 will need a key to access.

A bid bond is not required for this project.

A licensed subcontractor is allowed for the spraying of herbicide.
